

Plenitude Company Profile

Plenitude, a subsidiary of Eni, operates within the market with a distinctive business model that seamlessly integrates renewable energy production, energy sales and solutions, along with an extensive network of electric vehicle charging points.

Plenitude provides energy to approximately 10 million European retail customers, aiming to extend its reach to over 11 million customers by 2026. The company has a renewable operational capacity portfolio of 2.5 GW and aims to scale to over 7 GW by 2026 and over 15 GW by 2030.

In the electric mobility sector, it owns a network of over 17,000 charging points, which is set to expand across Italy and Europe, with the aim of reaching 30,000 points by 2026. Plenitude is also a leader in Italy for generating distributed energy from small-scale photovoltaic systems.

Plenitude operates as a Benefit Company, incorporating within its Charter the objective of having a positive impact on people, communities, and the environment. It aligns with Eni's broader commitment to create value through the energy transition. Operating in 15 countries worldwide, Plenitude will achieve net-zero CO₂ emissions for Scope 1, 2, and 3 by 2040, and through an integrated and diversified approach, it will provide 100% decarbonized energy to all its customers.
